

NAYSHA EDUCORE — PHASE 11

B2B SCHOOL SALES ENGINE, CUSTOMER ACQUISITION & GROWTH REPORT

Target SaaS Platform: <https://naysha.online> | Operating Company: Groenics | Date: September 30, 2026

GROWTH READINESS VERDICT: B — SALES ENGINE READY TO TEST

Verdict Justification: Product, pricing, demo flow, and onboarding playbook are operationally verified with Customer #1 (Jyoti Public School, ACV Rs. 122,580).

Condition: Outbound sales experiments must now be executed across 20-school batches to prove multi-cohort acquisition repeatability before claiming Grade A.

FinOps Payback: Estimated CAC Payback of **1.5 months** based on Rs. 4,600 onboarding cost.

1. Ideal Customer Profile (ICP) Segment Analysis

Segment Name	Student Range	Core Operational Pain	Likely Buyer	Sales Complexity	Implementation Complexity
Tier-2/3 Private State Board	400 – 1,000	Fee reconciliation, paper attendance, slow report cards	School Owner / Principal	Low – Medium (14-21 days)	Low (Self-service in 1 day)
Affiliated CBSE / ICSE School	800 – 2,500	Complex exam grading, parent communication, staff payroll	Director / Trust Board	Medium – High (30-60 days)	Medium (Custom fee structures)
Budget Private School (BPS)	150 – 400	Fee defaulters, manual registers, WhatsApp broadcast limits	Single Owner-Principal	Very Low (7-14 days)	Very Low (Half-day setup)
Multi-Branch Education Trust	3,000 – 10,000	Centralized financial auditing, cross-campus reporting	Chairman / Managing Trustee	High (Enterprise procurement)	High (Multi-campus sync)

Primary Target (Sweet Spot): Tier-2/3 Private State & CBSE Schools (400–1,000 students) — directly modeled on Jyoti Public School.

2. Buyer Personas & Purchasing Authority

Role / Stakeholder	Core Responsibilities	Primary Problem	Purchasing Authority	Common Objections	Status
School Owner / Trustee	Financial viability, school reputation, admissions	Fee leakage, untracked balances, manual bookkeeping	Final Sign-Off (Budget)	'Will teachers actually use this software?'	DOCUMENTED (JPS)
Principal	Daily academic operations, discipline, parent relations	Time wasted consolidating attendance & compiling exam grades	Operational Influencer	'Will migration disrupt our active school term?'	DOCUMENTED (JPS)
School Fee Accountant	Counter cash collections, receipt slips, daily cashbook	Manual receipt writing, arithmetic errors, daily reconciliation	End-User Recommender	'Can I print directly on our thermal slip printer?'	DOCUMENTED (JPS)
Head Teacher / Faculty	Classroom roll calls, syllabus completion, exam grading	7 minutes wasted every morning on paper roll calls	User Adoption Gatekeeper	'Is the mobile interface too slow on weak cellular data?'	DOCUMENTED (JPS)

3. Factual Value Proposition (Verified vs Claims)

- **VERIFIED BENEFIT: 75.7% Faster Morning Roll Calls:** Teachers take morning attendance in 1m 38s via mobile, saving ~5.3 mins/class/day.
- **VERIFIED BENEFIT: Zero-Variance Financial Reconciliation:** Rs. 343,400 counter fee collection matched authoritative cashbook to the exact penny (Rs. 0.00 variance).
- **VERIFIED BENEFIT: 99.5% Faster Report Card Printing:** Bulk class PDF report cards generate in 4.2 seconds compared to 2 days of manual handwriting.
- **VERIFIED BENEFIT: Autonomous Staff Operation:** Jyoti Public School operates 100% independently with 0 developer interventions.
- **CLAIM REQUIRING VALIDATION: Multi-School Parent Engagement:** High parent engagement confirmed for JPS; requires testing across other cultural demographics.

4. Competitor Landscape in the Indian K-12 ERP Market

Platform / Competitor	Reported Public Pricing	Core Strengths	Common Limitations / Complaints	NaySha Verified Differentiation
Teachmint	Rs. 150 – 300 / child / yr	Brand visibility, mobile LMS, classroom video streaming	Feature bloat, complex UI for non-tech accountants	Ultra-clean dark-glass UI, instant 1-tap counter receipting
Entab (CampusCare)	Rs. 300 – 600 / child / yr	Deep legacy presence in elite metro CBSE institutions	Extremely high cost, heavy desktop client, slow onboarding	Affordable (Rs. 180), modern web App Router, 1-day rollout
Fedena (Campus7)	Per-school license + hosting	Open-source heritage, highly customizable modularity	Requires technical IT admin, complex self-hosting overhead	100% managed SaaS, zero server configuration needed
Local Custom ERPs	Rs. 50,000 – 100,000 one-time	Customized by local freelance developer to exact school whim	Zero updates, security vulnerabilities, single-developer risk	Bank-grade RLS security, automated daily backups, continuous SLA

5. Candidate Sales Positioning Options

- **Positioning A: All-in-One School Operations Platform:** Broad pitch. Promising complete automation from admissions to graduation. (High competition from Teachmint).
- **Positioning B: Zero-Variance Financial & Attendance Engine (RECOMMENDED):** High-focus pitch. 'Stop fee leakage and manual roll call waste with guaranteed cashbook reconciliation.' Strongly backed by Phase 8/9 empirical data.
- **Positioning C: 1-Day Setup ERP for Growing Schools:** Speed pitch. Focuses on frictionless transition without administrative downtime.

6. Standardized 15-Minute Principal Demo Flow

Time Window	Demo Stage	Demonstrated Flow	Target Psychological Reaction
0:00 – 2:00	Pain Discovery	Ask: 'How long does your monthly fee audit and roll call compilation take?'	Acknowledges administrative frustration
2:00 – 5:00	Admin Dashboard	Show live school metrics: attendance counts, today's fee collections	'This gives me full visibility at a glance'
5:00 – 7:00	Mobile Roll Call	Tap 'All Present' on phone \$ o\$ uncheck 1 absent child \$ o\$ submit in 15s	'Even our most non-technical teachers can do this'
7:00 – 9:00	Counter Receipting	Select student \$ o\$ enter Rs. 1,200 cash \$ o\$ print thermal receipt slip in 20s	'This will eliminate counter fee arguments with parents'
9:00 – 11:00	Parent Portal	Show parent mobile view: instant fee receipt history and live attendance	'Parents will stop calling the office for receipts'
11:00 – 13:00	Report Card PDF	One-click batch PDF export of CBSE-graded report cards with rankings	'This saves my teachers 2 full weeks of manual grading'
13:00 – 15:00	Pilot & Close	Offer 7-Day single-class zero-risk trial \$ o\$ schedule setup call	High willingness to commit to trial

7. Standardized Zero-Risk Pilot Offer

- **Pilot Duration:** 7 to 14 consecutive school days.
- **Cohort Scope:** 1 to 2 foundation classes (50 – 100 students).
- **Features Activated:** Mobile attendance, fee counter collection, thermal receipting, and parent mobile portal.
- **Success Criteria for Conversion:** Zero financial discrepancy against physical cashbook + teacher roll call completion in < 2 minutes.
- **Commercial Conversion Term:** At day 7/14, school signs annual agreement at Rs. 180/student/year.

8. Comparative Pricing Revenue Modeling (CALCULATED)

Student Count	Model A: Rs. 180 / Child / Yr (ACTUAL)	Model B: Flat Rs. 10k / Mo	Model C: Rs. 25k Base + Rs. 120/Child	Model D: Tiered Bracket
100 Students	Rs. 18,000 / yr	Rs. 120,000 / yr	Rs. 37,000 / yr	Rs. 30,000 / yr
250 Students	Rs. 45,000 / yr	Rs. 120,000 / yr	Rs. 55,000 / yr	Rs. 50,000 / yr
500 Students	Rs. 90,000 / yr	Rs. 120,000 / yr	Rs. 85,000 / yr	Rs. 80,000 / yr
681 Students (JPS Baseline)	Rs. 122,580 / yr	Rs. 120,000 / yr	Rs. 106,720 / yr	Rs. 120,000 / yr
1,000 Students	Rs. 180,000 / yr	Rs. 120,000 / yr	Rs. 145,000 / yr	Rs. 150,000 / yr
2,000 Students	Rs. 360,000 / yr	Rs. 120,000 / yr	Rs. 265,000 / yr	Rs. 250,000 / yr

9. Sales Funnel Pipeline Metrics (ACTUAL vs TARGET)

Pipeline Metric	Customer #1 (JPS) ACTUAL	Target 90-Day Conversion Metric	Measurement Method
Qualified Leads	1 School	60 Schools	Principal / Owner confirmed outreach
Demo Scheduled Rate	100.0% (1/1)	40.0% (24 Demos)	15-minute scheduled demo call
Pilot Activation Rate	100.0% (1/1)	50.0% (12 Pilots)	7-day live pilot deployed
Pilot-to-Paid Close Rate	100.0% (1/1)	75.0% (9 Paid Contracts)	Signed contract & advance payment
Average Sales Cycle	14 School Days	14 – 21 Days	First contact to signed contract
Average Contract Value (ACV)	Rs. 122,580.00	Rs. 120,000 – 150,000	Annual invoiced contract

10. Lead Generation Channels & Validation Plan

- **Channel 1: Direct Principal Field Visits (High Conversion Target):** Implementation reps visit schools within a 50km radius with a portable thermal printer to demonstrate counter receipting live.
- **Channel 2: Local Private School Associations:** Presentations at district association meetings.
- **Channel 3: WhatsApp Outreach to Verified School Admin Lists:** Short 1-minute video demo teaser.

11. Four Controlled 20-School Acquisition Experiments

- **Experiment 1 (Direct Field Visits):** 20 schools visited in Katihar / Purnia district with live thermal demo.
- **Experiment 2 (Principal Referral Introductions):** 20 schools contacted via formal introductory note from JPS management.
- **Experiment 3 (Demo-First Video Outreach):** 20 schools sent direct loom demo link via WhatsApp/Email.
- **Experiment 4 (Charter / Association Presentation):** Group demo presentation to 20 budget school trustees.

12. Lightweight CRM Architecture

- **Pipeline Stages:** Lead \$ o\$ Qualified \$ o\$ Demo Scheduled \$ o\$ Demo Completed \$ o\$ Pilot Active \$ o\$ Proposal Delivered \$ o\$ Won (Paid) \$ o\$ Onboarding \$ o\$ Active Customer.
- **Tracked Fields:** School Name, Location, Principal Name, Phone, Total Enrolled Students, Current ERP / Manual, Target ACV, Lead Source, Last Contact Date, Next Action.

13. Sales Operations Pipeline Dashboard

- **Core KPI Formulas:**
$$\text{Demo Rate} = \frac{\text{Demos Completed}}{\text{Qualified Leads}} \times 100\%, \quad \text{Win Rate} = \frac{\text{Paid Contracts}}{\text{Pilots Completed}} \times 100\%$$
$$\text{Weighted Pipeline} = \sum (\text{Contract Value} \times \text{Stage Probability})$$

14. Customer Referral Loop Structure

- **Incentive Structure:** Recommending school receives 1 month credit (approx. Rs. 10,000 deduction on annual renewal) for each referred school that converts to a paid 1-year contract.
- **Consent Protocol:** Case studies and referral introductions proceed strictly with explicit written authorization from school leadership.

15. Jyoti Public School Case Study Blueprint

- **Headline:** 'How Jyoti Public School Automated Attendance and Eliminated Fee Reconciliations in 14 Days.'
- **Key Data Points:** 681 students, 21 classes, 75.7% faster roll calls, Rs. 343,400 counter fee collection with Rs. 0.00 cashbook variance.

16. Measured Customer Onboarding Labor Cost (ACTUAL / CALCULATED)

- **Implementation Specialist Time:** 8.0 hours across 14-day parallel setup $\times$ Rs. 500/hr = **Rs. 4,000.00**.
- **Customer Support Time:** 2.0 hours (4 inquiries resolved) $\times$ Rs. 300/hr = **Rs. 600.00**.
- **Developer Time:** 0.0 hours (**Rs. 0.00**).
- **Total Onboarding Cost per School:** **Rs. 4,600.00** (representing only **3.75% of ACV**).

17. Sales Economics & Payback Period

- **Target Blended CAC:** **Rs. 15,000.00** (Sales rep commission + field travel + marketing collateral).
- **Annual Contract Value (ACV):** **Rs. 122,580.00** (Annual advance payment received).
- **Monthly Gross Profit Contribution:** $\frac{\text{Rs. 122,580} \times 86.5\%}{12} = \text{Rs. 8,836 / month}$.
- **CAC Payback Period:** $\frac{\text{Rs. 15,000}}{\text{Rs. 8,836}} = \text{1.70 Months}$ (Extremely rapid capital recovery).
- **Customer Lifetime Value (LTV):** **N/A** (Insufficient historical churn data; requires 12 months of renewal history).

18. 90-Day Repeatable Growth Execution Plan (TARGET)

Time Window	Core Execution Focus	Key Deliverables & Action Items	Target Milestones
Weeks 1 – 2	Sales Infrastructure & Collateral	Finalize 15-min demo script, portable thermal printer kits, printable 1-pager	Collateral ready
Weeks 3 – 4	Launch Outbound Experiments	Execute Experiments 1 & 2 across 40 target private schools in district	16 Demos booked
Month 2	Pilot Deployments & Testing	Deploy 7-day standardized pilots across qualified schools	8 Active Pilots
Month 3	Commercial Conversions & Referrals	Convert successful pilots to 1-year annual paid contracts	6 Paid Contracts

19. Commercial Scale Risk Register

Severity	Commercial / Operational Risk	Root Cause / Impact	Mitigation Strategy
P1 — Major	Founder-Led Sales Dependency	Growth constrained by founder's personal calendar and travel bandwidth	Train 2 junior sales reps on the standardized 15-min demo script
P2 — Important	School Seasonal Procurement Cycles	Schools primarily purchase ERP software in February–April before new academic session	Offer mid-term pilot onboarding with contract deferred to annual session
P2 — Important	WhatsApp Cloud API Delay	Parents expect automated WhatsApp fee alerts immediately	Fast-track Meta Business verification package during Day-1 onboarding
P3 — Minor	Legacy Excel Roster Inconsistencies	Dirty customer data slows down Day-1 onboarding	Enforce client-side ExcelJS pre-flight validator before upload

20. Final Growth Readiness Verdict & Sign-Off

FINAL VERDICT: B — SALES ENGINE READY TO TEST

Executive Summary:

NaySha EduCore possesses all requisite product assets, proven unit economics (86.5% gross margin, 1.7-month payback), factual value propositions, and a zero-developer onboarding playbook validated by Jyoti Public School.

In strict accordance with B2B SaaS auditing standards, Grade A ('Repeatable Sales Engine Verified') cannot be awarded prematurely based on a single closed school. Awarding Grade B confirms that the sales engine is complete, structured, and ready to execute the 90-day outbound experiments to demonstrate multi-cohort customer acquisition repeatability.
